DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-¹³~~14~~, 56-59, 75 and 76, are drawn to a control circuit for a DC/DC converter circuit that is responsive to the power converter circuit to effect a minimum current limit, classified in class 363, subclass 21.09.
 - II. Claims 14-36, 60-68, are drawn to a controlled rectifier circuit with a hold-off circuit that is activated to disable the controlled rectifier, classified in class 323, subclass 284.
 - III. Claims 37-55, 69-74, are drawn to a controlled rectifier circuit with a decision logic circuit to generate an enable/disable signal to gradually change the degree to which the controlled rectifier is turned off or on such that a substantial momentary deviation in the output voltage is avoided when the controlled rectifier is enabled or disabled classified in class 323, subclass 274^{75, +76}

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as using a threshold current to control the conversion of the inverter circuit. Invention II has separate utility such as using a hold-off circuit to effect or control the

output voltage of the converter device. Invention III has separate utility such as using a decision logic circuit to effectively control output voltage maintain its linear voltage output. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I, II is not required for Group III, restriction for examination purposes as indicated is proper.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
